

Honeywell

Create your
ultimate comfort
zone with
evohome Wi-Fi

Smart zoning, intelligent scheduling and
mobile control for your home heating system.

Creating the perfect comfort zone.

With evohome Wi-Fi, you are in charge. It makes managing your home heating simple, and could save you money on your energy bill too.

More comfort – you can easily control the temperature in any room or zone in your home, all from the comfort of your armchair.

More control – forget the old days when you had to be at home to switch the heating on – with **evohome** you can do it all from your smartphone, no matter where you are.

Energy savings – If you have a system that allows you to control where and when you heat your home you will make a difference to your energy bills.

Smart zoning for any heating system.

evohome Wi-Fi means you're always in charge of your home heating system – wherever you are.

At its heart is the **evohome Wi-Fi** controller, your simple to use control panel that lets you set the temperature in any room of your home – from anywhere in your house.

evohome works around your home, allowing you to add as many radiators or zones as you prefer.

The modular design means you can easily and quickly smart zone your entire home from day one or add zoning later on.

Plus, it will fit just about any property. So whether you have underfloor heating, stored or shared hot water, or even an on-demand boiler – it will work for you.

Also, because **evohome** is wireless, everything can be installed quickly without any renovation.

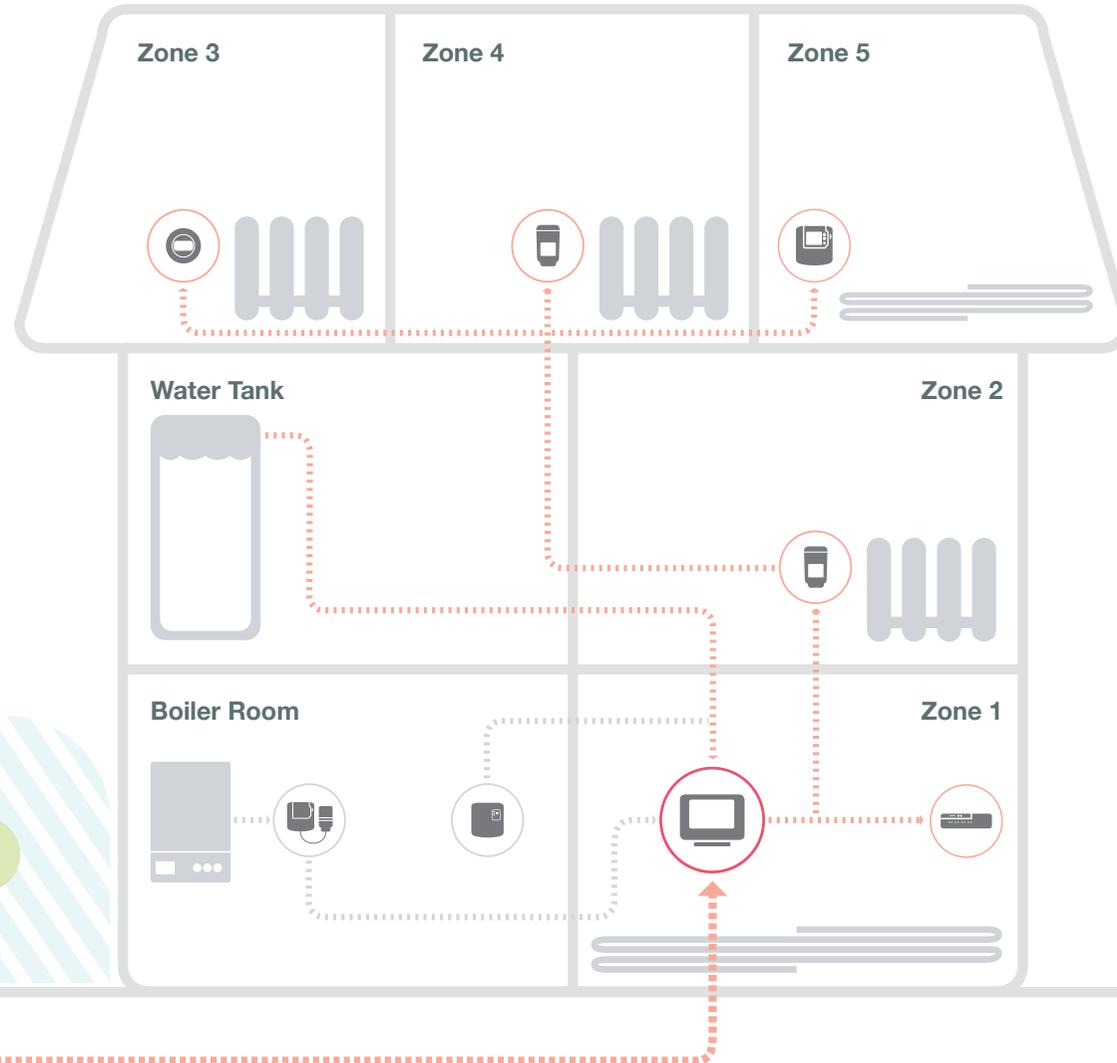

Mobile Control

Easy to install – evohome Wi-Fi has built in Wi-Fi technology which can easily be added to your home wireless network. Additionally all the **evohome** components communicate over the Honeywell wireless

standard which is reliable, long range and low power. This means that they can be installed quickly and without disruption or renovation. Nice and Simple.

Control your heating system whenever you want, wherever you are.

In the old days you had to get home to switch on your heating. The evohome mobile app makes that a thing of the past.

Running late, or coming home ahead of schedule? With **evohome** you can turn your heating on or off, up or down — all from your app.

evohome works with IFTTT, allowing you to automate your home's heating around you and your life – in real time, all of the time.

Your system could be set to automatically turn your heating off when you're out of the home, or to switch back on if it snows. The possibilities are infinite and easy to create. Visit getconnected.honeywell.com to find out more.

Summer is here! If current temperature rises above 21c then turn off the heating Add

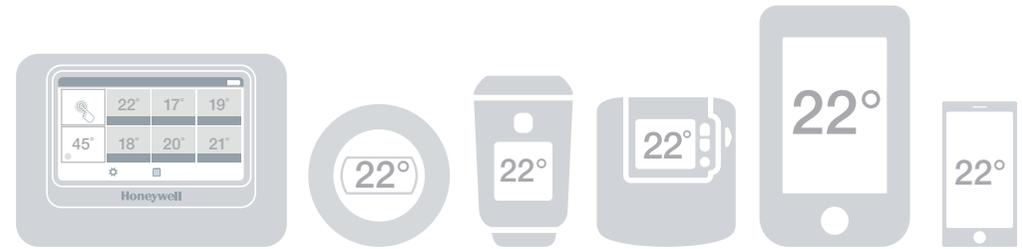

by honeywell 👤 35 IFTTT

Optimise your home for your comfort.

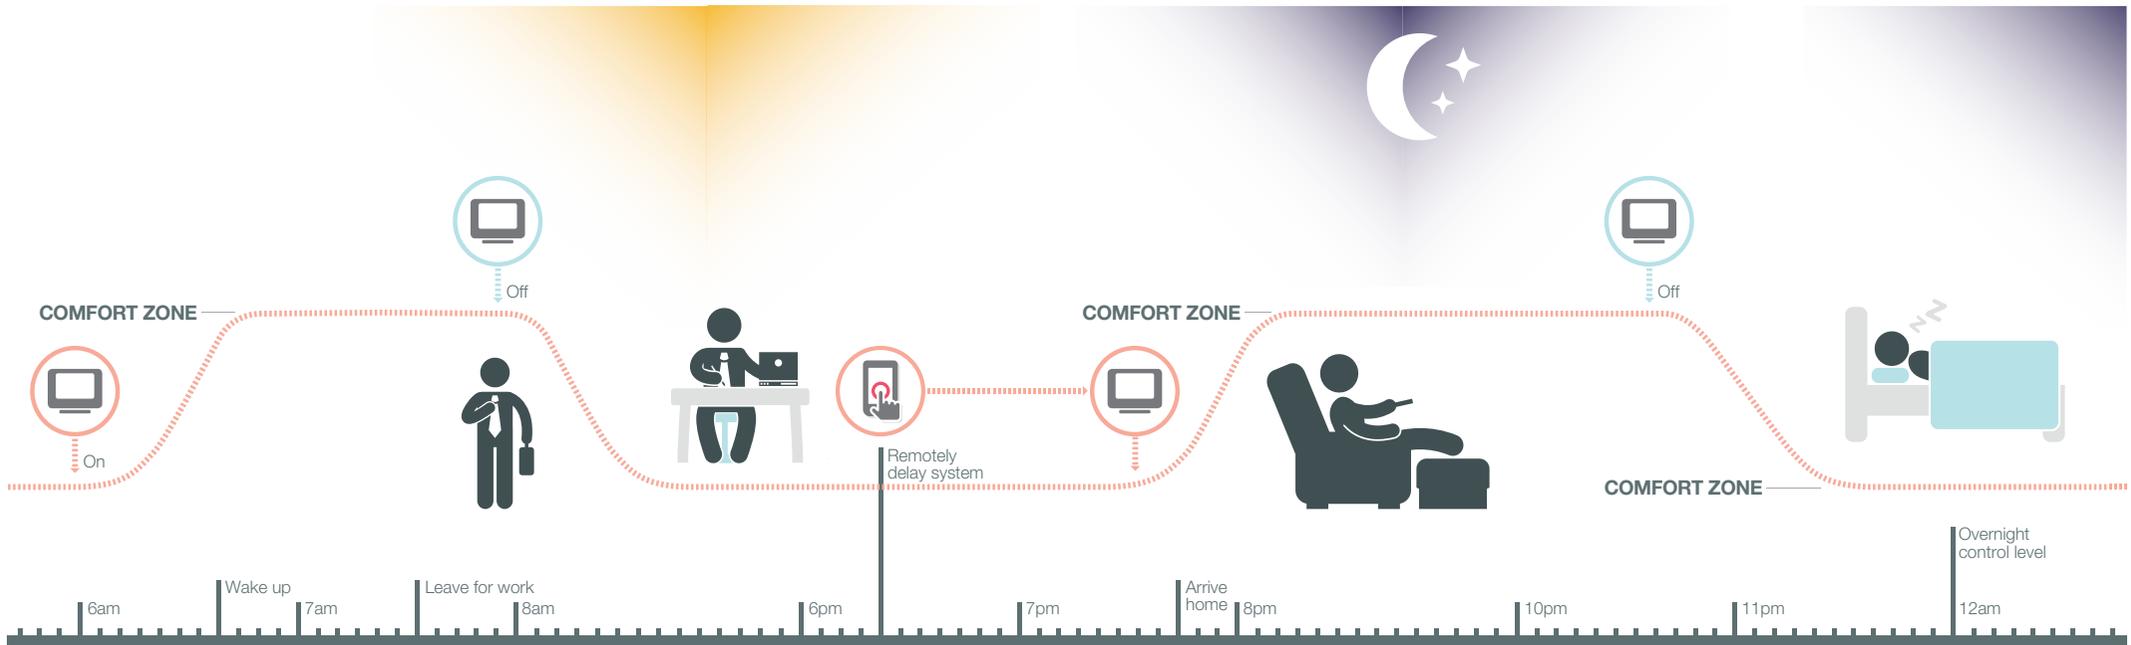

It's not just about switching your heating on and off. It's about setting the temperature for different times of the day, for every zone, for the whole week.

evohome is constantly learning and lets you create your own precise heating schedule that reflects your lifestyle, and the way you use your home.

Across our range of controllers and interfaces you get to see and control exactly what temperature you want.

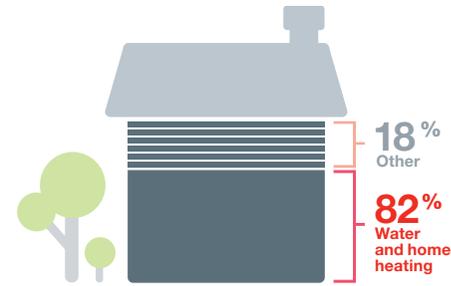

evohome learns exactly how long your property takes to heat up, activating exactly when it needs to for your heating and hot water to be at the perfect temperature – just at the right time.

After a long day at work, evohome Wi-Fi allows you to remotely control your heating so it's at the perfect temperature just in time for you getting home.

At night, evohome thinks ahead too. If you tell it exactly when you're planning on sleeping it will learn the optimal time when to turn the heating off, meaning you can sleep at the perfect temperature knowing you are saving money – everyday and all through the night.

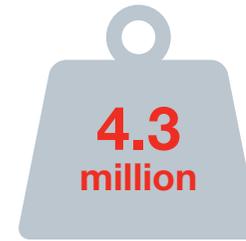

Save energy through better control.

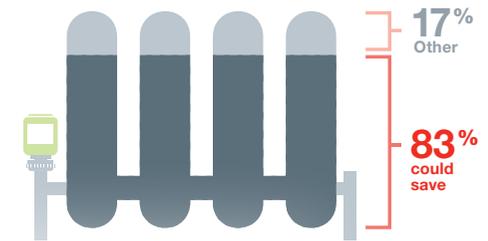

82% of energy consumed in the home is used by heating and hot water. Reduce your heating bills by controlling your heating room by room for more control, comfort and efficiency.

Upgrading your basic timer and thermostat controls to **evohome Wi-Fi** smart zoning could deliver as much as 40% savings on heating your home.*

4.3 million tonnes of CO₂ per year could be saved if all homes in the UK had better heating controls. *Source: DECC 2010.*

83% of homes in the UK can save energy with better controls. *Source: DECC 2010.*

7 out of 10 UK homes lack the minimum controls cited in the 2010 building regulations. *Source: DECC 2010.*

evohome could pay itself back in 2.5 years.

*Source Energy Saving Research Unit, Strathclyde University 2013 & TACMA 2013 – energy savings quoted were calculated using a 3 bedroom, 2 level home, located in the UK, modelling a family of 4 over a typical week's activity, comparing an evohome smart zoning system, with recommended settings, to a system comprising of a simple timer, single non-programmable room thermostat and no thermostatic radiator valves. Individual energy savings gained are dependent upon existing controls, environment and lifestyle.

Our products.

At Honeywell we know every home is different. **evohome** is modular and with our range of components you can customise your **evohome** to suit your property perfectly.

evohome Wi-Fi

The smart hub of your heating system, it allows you to schedule, zone and personalise your temperature and hot water with its full-colour touch screen and simple to use menu.

Radiator Controller

Used to control the radiators they act as both sensors and controllers for your zones. Using two-way wireless communication they are constantly learning about your home and in-touch with the main controller.

Single Zone Thermostat

The Single Zone Thermostat provides an additional point of control for your zone or room. Wireless and discrete, this is perfect for zones with underfloor heating or just when you need another point of control.

Design your perfect evohome.

Every home is different, so you can tailor your evohome to suit.

Radiator heating or underfloor heating? Stored hot water? Whether you live in a small apartment or a family home, **evohome** can help you take more control of your heating and hot water.

See how **evohome** fits your home for yourself with our interactive online System Builder. It'll tell you what components you'll need to create your perfect comfort zone.
